

Certificate of Completion

This is to certify that:
Dr xxxxxx (GDC/GMC/NMC No. xxxxx)

Attended a hands-on training session on the topic of:
Botulinum Toxin Type A

On
xx/xx/xxxx

This course awards 6 hours of Continued Professional Development

This course meets the criteria for the GDC's development outcome C

We confirm that the information provided
on this certificate is full and accurate

This CPD is subject to quality assurance by

T. Eldridge 73015

Aim:

To provide an overview on the use of Botulinum Toxin type A for cosmetic uses

Objectives:

Name the principal muscles involved in the treatment of the forehead, glabella and crow's feet, using botulinum toxin type A for cosmetic treatments.

Define the mode of action of botulinum toxin type A, explain its therapeutic effects including its limitations of use and any concerns with toxicology.

Select patients suitable for botulinum toxin type A, identifying contra-indications and cautions, side effect and possible adverse reactions.

State any pre-treatment care and recognise the need for consent.

Demonstrate the safe use of botulinum toxin type A in the forehead, glabella and crow's feet, including the correct equipment, dose and injection techniques.

Summarise appropriate written and verbal aftercare advice to patients who have received botulinum toxin type A.

Demonstrate the appropriate use of clinical record taking and recall good practice, in relation to handling complaints.

Describe safe storage and disposal methods for products and equipment.

Explain the insurance requirements to practise these treatments.

Learning Content:

To train Doctors, dentists and registered general nurses in the administration of botulinum toxin type A.
