

Advanced Botulinum Toxin Type A and Dermal Fillers Course

Aim:

- To provide an overview on the use of Botulinum Toxin Type A (BTX) and HA Dermal Fillers (DF) for cosmetic uses.

Objectives:

- Name the principal muscles involved in the treatment of the advanced areas of the face and neck using BTX.
- Name the layers of the epidermis and describe the therapeutic effects of DF, including their limitations when used as a cosmetic treatment.
- Define the mode of action of BTX and DF, explaining their therapeutic effects including limitations of use and any concerns with toxicology.
- Select patients suitable for BTX and DF, identifying contra-indications and cautions, side effects and possible adverse reactions.
- State any pre-treatment care and recognise the need for consent.
- Identify the need for topical or local anaesthesia and demonstrate its safe administration.
- Demonstrate the safe use of BTX in the brow lift, lower eye lid, nose (bunny lines), cheeks, gummy smiles, lower/upper lip wrinkling, chin, neck, and under arm sweating, including the correct equipment, dose and injection techniques.
- Demonstrate the safe use of DF in shaping eyebrows, treating the mid face, (tear trough, cheek bones and cheeks), lower third of face (lips, mandible and chin re-shaping), including the correct equipment, dose and injection techniques.
- Summarise with appropriate written and verbal aftercare advice to patients who have received BTX and DF.
- Demonstrate the appropriate use of clinical record taking and recall good practice in relation to handling complaints.
- Describe safe storage and disposal methods for products and equipment used.
- Explain the insurance requirements to practise these treatments.

Learning Content:

- To train Doctors, dentists and registered general nurses in the administration of BTX and DF for advanced areas of the face and neck.
